PROFESSIONAL SUMMARY

A Computer Science student at Green University of Bangladesh with a strong academic record and practical experience in full-stack web development and system design. Proficient in PHP, HTML, CSS, and database management, with working knowledge of C, C++, Java, and Python. Seeking an internship or entry-level role to apply technical skills and contribute to high-impact software projects.

EDUCATION

- **Green University of Bangladesh, Rupganj** — *2022–Present*
  BSc in CSE — CGPA: 3.78
- **Ullapara Science Collage, Ullapara** — *2019*
  Higher Secondary Certificate, Rajshahi Board — GPA: 5.00
- **Ullapara Adarsha High School, Ullapara** — *2017*
  Secondary School Certificate, Rajshahi Board — GPA: 5.00

THESIS

- **Explainable Hierarchical Attention Fusion for Bangla Fake News Detection using Semantic, Stylometric & Relational Graph Features** — *Expected: 2026*
  Supervisor: MS Babe Sultana, Department of CSE, Green University of Bangladesh
  - Developing an explainable deep learning framework for Bangla fake news detection by fusing semantic, stylometric, and relational graph features.
  - Applying hierarchical attention and Graph Neural Networks (GNN) to model article relationships and news propagation patterns.
  - Providing interpretable insights through attention-based explainability for transparent predictions.
  - Technologies: Python, PyTorch, Transformers, BanglaBERT, GNN, NetworkX, Scikit-learn, Pandas, Matplotlib.

PERSONAL PROJECTS

- **Process Scheduler Simulation** — *25-12-2024*
  Implemented and analyzed FCFS, SJF, Round Robin, and Priority scheduling algorithms using C/C++.
  - Implemented simulation comparing average waiting time across four CPU scheduling algorithms.
  - Performed performance analysis and comparative study of scheduling efficiency.
- **Data Communication – Live Code Implementation** — *04-06-2024*
  Implemented fundamental data communication and networking concepts through live coding using C/C++.
  - Implemented practical data communication concepts in a live coding environment.
  - Applied networking principles and protocols for reliable data transmission.
- **FlexFlow – Full-Stack Web Application** (Ongoing – 50% Complete) — *2024–Present*
  Ongoing full-stack web application developed using PHP, HTML5, CSS3, and MySQL with database integration.
  - Developing a comprehensive web application using PHP backend with HTML5 and CSS3 frontend.
  - Building a point-based freelancer–employer platform where freelancers gain points based on performance, and new freelancers get additional tasks to encourage growth and participation.

TECHNICAL SKILLS AND INTERESTS

Languages: PHP, SQL,C, C++, Java, Python,
Developer Tools: Git, GitHub, VS Code, CodeBlocks, NetBeans
Frameworks: Flutter (Learning)
Soft Skills: Problem Solving, Teamwork & Collaboration, Leadership, Learning Agility
Coursework: Data Structures, Algorithms, Web Development, Database Management, Data Communication, Operating Systems, Artificial Intelligence, Data Mining
Areas of Interest: Mobile App Development (Flutter), System Design, Machine Learning, Web Applications, Algorithm Optimization

AWARDS & RECOGNITION

- **Internship:** Completed internship from Battery Low Interactive Ltd using AR, VR. *2026*
- **Machine Learning Certificate:** Bondstein Company (15-hour Bootcamp, 2025) *2025*
- **Dean Award:** Green University of Bangladesh – Awarded 3 times for Academic Excellence *2024*
- **Vice-Chancellor Award:** Green University of Bangladesh – Academic Excellence *2022*
